

## Progress Report

### Milestones:

- Made substantial progress on post-MVP goals and features
  - Split claims
  - Removing claims
  - Public lists
  - Email notifications

### Difficulties Encountered:

- We sent too many emails while testing and developing, so Google froze our gmail account
- Our first deployment to Openshift broke and we had to completely remove and re-deploy our web app which took much longer than expected

### Next Steps:

- Finish up remaining features that were planned (search on public lists, permalinks for public lists, more work on handling split claims, some UI improvements, etc.)
- Given time, possibly improve features if we have more ideas
